

## Technical monitoring autumn 2009/winter 2010

Monitoring of the Grand Backa Canal water and sediments quality is continuing until Autumn 2012 and it is funded by the Fund for Environmental Protection aka "Ekofond" of the Republic of Serbia. Monitoring report for the autumn 2009/winter 2010 is completed and submitted to the Ministry of Environment and Spatial Planning and Hot Spot project team while the spring/summer 2010 season monitoring has started.

More information on this you can find under Activities, Clean-up.
